

SEM CORDER

THE SOLUTION OF DIGITAL VOICE RECORDING

foton
lights your dream

foton
lights your dream

A Stand-Alone, portable Digital Recording Solution Designed for Seminars, Congress, Conferences and Meetings...

In the past, hastily scrawled short-hand notes, illegible forms, and dozen of loose sheets of paper attached to tapes were the order of the day for most of the proceedings. Tapes were frequently stored inaccessibly in warehouses or in back rooms, potentially mislabeled or misplaced and subject to continuous degradation. Providing tapes for transcriptionists typically involved valuable time is wasted while locating them. Even when one could find the correct tape, queue it up to the correct position and hear it well enough to transcribe it, valuable hours were already lost.

So, What about meeting rooms in your company?

The meetings during hours, critical discussions, taken important decisions, missing or lost paper notes...

SEMCORDER
